

# PK Solutions 2.0

Pharmacokinetics Data Analysis for Education and Research

## Special Academic Courseware Program - "Learn-and-Keep" Plan

The plan is designed to make PK Solutions an affordable option for both students and the academic institution. The plan provides a **25% savings** for a one-time purchase of a departmental site license. No annual fees. Additionally, the plan provides a full single user license for each student enrolled in the class at an **80% discount** off the regular price. As a fully registered user, each student receives a complete copy of the software and User Guide. Instead of being limited to campus use of the software, the student is entitled to take the program with them for homework, personal use and later into practice; they receive all the benefits of registered ownership. Plus, students automatically receive any

upgrades to PK Solutions produced within the academic year, free by email. That is another \$99 savings to the student under this plan. The initial minimum qualification for the plan is 10 students. A discounted copy of PK Solutions must be purchased for or by each student enrolled in the pharmacokinetics course. Academic departments with a current site license are automatically qualified for the plan. If this plan is adopted within 6 months of the purchase of PK Solutions at the regular price for evaluation and individual use, a 100% rebate of that original cost will be applied. This Plan is a great deal for faculty, staff, students, and computer labs. Contact Summit for further details or a quote.
